[1] QID: 17

Question : A loop attempts to access characters beyond the string length, causing an exception.

on. Fix the boundary condition.

```
public class Q17_Boundary {  
    public static void main(String[] args) {  
        String str = "Java";  
        for(int i=0;i
```

```
Program : public class boundary{  
    public static void main(String[] args){  
        int count=0;  
        String str="java";  
        for(int i=0;i
```

Input : (no input)

Output : Error: boundary.java:5: error: cannot find symbol

```
for(int i=0;i
```

[2] QID: 3

Question : A program attempts to print the length of a string but results in a runtime exception.

tion. Analyze the issue and modify the code to handle it properly.

```
public class Q2_NullPointer {  
    public static void main(String[] args) {  
        String str = null;  
        if(str != null)  
            System.out.println(str.length());  
        else  
            System.out.println("String is null");  
    }  
}
```

```
Program : public class nullpointer{  
    public static void main(String[] args){  
        String str=null;  
        if(str!=null)  
            System.out.println("str.length");  
        else  
            System.out.println("string is null");  
    }  
}
```

Input : (no input)

Output : string is null

[3] QID: 18

Question : An array assignment uses an invalid index, leading to an error. Identify and correct the index usage.

```
public class Q18_ArrayBounds {  
    public static void main(String[] args) {
```

Submitted Answers Report

```
int arr[] = new int[3];  
arr[2] = 10;  
System.out.println(arr[2]);  
}  
}
```

Program :

```
public class arraybound{  
    public static void main(String[]args){  
        int arr[]=new int[3];  
        arr[2]=10;  
        System.out.println(arr[2]);  
    }  
}
```

Input : (no input)

Output : 10

[4] QID: 12

Question : A loop skips the first element of an array while printing values. Identify the error.

ror in the loop and correct it.

```
public class Q12_LoopFix {  
    public static void main(String[] args) {  
        int arr[] = {1,2,3};  
        for(int i=0; i
```

```
Program : public class loopfix{  
    public static void main(String[]args){  
        int arr[]={1,2,3};  
        for(int i=0;i
```

Input : (no input)

Output : 1

2

3
